PROFESSIONAL SUMMARY

Full-Stack Developer (Web & Mobile) with 3+ years of experience building and shipping production applications with Flutter, React, and Node.js. Full-time at Sityx and part-time Flutter developer at Casper AI, contributing to Wink Delivery, a live multi-app delivery platform. Published an Arabic puzzle game (Wasla) on Google Play and an open-source Flutter package on pub.dev. Experienced in clean architecture, state management (GetX, Riverpod), REST APIs, real-time features (WebSockets, Firebase), and SQL/NoSQL databases. Holds a Bachelor of Information and Technology Engineering (Data Science) and is pursuing a Master's in Web Science and Artificial Intelligence. Open to remote, full-time, and contract roles.

SKILLS

Mobile & Front-End: Flutter, Dart, React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Vue.js, Responsive Design, i18n / RTL, React Native (basic)

Back-End & Data: Node.js, Express.js, REST APIs, WebSockets, Socket.io, JWT Authentication, PostgreSQL, MySQL, MongoDB, SQLite, SQL, Hive, Firebase, Sequelize

Architecture & Practices: Clean Architecture, Feature-First, Riverpod, GetX, Offline-First, Automated Testing, Accessibility (WCAG), SDLC, Agile

Tools & AI: Git, GitHub, Docker, CI/CD, Google Play Console, Stripe, Figma, OpenAI API, HuggingFace, Claude, Gemini, GitHub Copilot, Prompt Engineering

Programming Languages: Dart, JavaScript, TypeScript, Python, Java, C++, C#

Spoken Languages: Arabic (Native), English (Intermediate)

WORK EXPERIENCE

Flutter Developer | Casper AI

Remote | Part-time | Jul 2026 – Present

- Build cross-platform Flutter applications for Casper AI's AI-powered products, implementing clean UI architecture and complex state management.
- Core contributor to Wink Delivery, a live delivery platform made up of three Flutter apps (customer, merchant/admin, and driver) serving real customers and orders.
- Integrate mobile apps with backend APIs and an AI layer that personalizes offers based on customer behavior.

Sityx | As-Suwayda, Syria (Remote)

May 2023 – Present

Full-Stack Developer | Full-time | Feb 2026 – Present

- Build and maintain end-to-end web applications for Sityx, a cloud hosting and software company, using React, Node.js, and Express, from responsive frontends and REST APIs to databases and deployment.
- Developed the company's bilingual (Arabic/English) website with full RTL support, interactive monthly/yearly hosting-plan pricing, live domain search, and a lead-generation form that routes requests by service type.

Backend Developer, then Flutter Developer | Part-time | May 2023 – Jan 2026

- Started as a backend developer and moved into Flutter mobile development after completing the company's training program.

Mobile Application Developer (Volunteer) | Al-Anqoud Multi-Service Platform

As-Suwayda, Syria | Bread Distribution Mobile Solution | Aug 2025 – Dec 2025

- Built the offline-first Flutter app used by citizens and field agents to manage regional bread quotas and distribution tasks, with local caching and background synchronization for areas with unstable connectivity.
- Engineered a high-speed QR validation module with optimized camera handling for near-instant scan-to-verify by field agents.
- Set up CI/CD pipelines for automated builds and distribution, and designed an accessible, WCAG-conscious UI suited to elderly users.

Flutter Developer Trainee (Internship) | MadSolution Company

Syria | Jul 2024 – Aug 2024

- Developed cross-platform Flutter applications, integrated REST APIs, and managed application state for reliability.
- Worked across the full software development lifecycle (SDLC) in a team under tight deadlines; received a Certificate of Appreciation.

PROJECTS

Wasla — Arabic Word-Connect Puzzle Game (Google Play) | Flutter, Dart, Riverpod, Hive, AdMob

- Built and released solo on Google Play an Arabic word-connect puzzle game with 155 levels generated by a custom Dart CLI from an 868-word Arabic dictionary.
- Implemented Arabic text normalization, a bilingual Arabic/English RTL interface, AdMob ads with Google UMP consent, and 1,020+ automated tests.

Hebr — Private Tutoring Platform | React, Node.js, Flutter

- Built a live tutoring marketplace connecting students and parents in the UAE with vetted private tutors, with a React/Node.js web app and a companion Flutter mobile app.
- Implemented a package-based subscription system with tiered AED pricing, tutor vetting, and separate onboarding flows for tutors and referral agents.

debug_layout_hud — Open-Source Flutter Package | Flutter, Dart, pub.dev, MIT License

- Designed and published an open-source package on pub.dev: a debug-only floating HUD showing live screen size, custom breakpoints, text scale, and text direction, with MediaQuery-driven rebuilds for minimal overhead.

Tala Net — ISP Customer Portal | React, Node.js, Express, PostgreSQL, Sequelize, Tailwind CSS

- Built a full-stack ISP dashboard where customers track data usage and request speed upgrades, with an admin panel for users, subscriptions, and bandwidth requests.
- Implemented HTTP-only session auth with bcrypt, rate limiting, role-based route protection, and bilingual (English/Arabic) RTL.

Velour Beauty — E-Commerce Platform | MongoDB, Express, React, Node.js, Stripe, JWT

- Developed a MERN e-commerce platform with product catalog, cart, secure checkout, Stripe payments, order tracking, JWT authentication, and a role-based admin panel.

Sufra — Community Food Sharing Platform | React, Node.js, MongoDB, Socket.io, Tailwind CSS

- Built a food-donation platform connecting restaurants with communities through a "Suspended Meals" donation system and shared-delivery matching, with real-time impact tracking.

Dream Weaver — AI Mobile Application | Flutter, Riverpod, Docker, NVIDIA CUDA, Vue.js, Node.js

- Built a Flutter app (Clean Architecture, Riverpod) that turns text dream descriptions into AI-generated images (HuggingFace, OpenAI), backed by a GPU-accelerated Docker/NVIDIA CUDA service, JWT authentication, voice-to-text, and a Vue.js/Node.js admin dashboard.

Institute Course Management App | Flutter, Dart

- Built a course management app for educational institutes with a protected administrative portal for managing courses, content, and student access, plus real-time course browsing for students.

EDUCATION

Master's in Web Science and Artificial Intelligence
Syrian Virtual University, Syria | 2026 – Present

Bachelor of Information and Technology Engineering (ITE) — Major: Data Science
Syrian Virtual University, Syria | 2020 – 2026

Bachelor's Degree in Business Administration
University of the People, United States (Online) | 2020 – 2025

Diploma in Business Administration
University of the People, United States (Online) | 2025 – Present

ACTIVITIES

University ICPC Team Participant | Syrian Virtual University | 2024

- Competed on a university team in the Syrian university-level ICPC, the pathway to the Arab Collegiate Programming Contest (ACPC).
- Selected from approximately 500 participants for an advanced coaching cohort; completed a month of intensive training (7–10 hours a day).
- Solved 205 Codeforces problems (graphs, dynamic programming, greedy, number theory) in C++ and Python.
