

RAND ORAIJ

Full-Stack Developer (Web & Mobile) | Flutter | React | Node.js

As-Suwayda, Syria | +963 992 684 568 | randorij27@gmail.com | GitHub: github.com/r1356-w

Portfolio: r1356-w.github.io/Rand-Portfolio | LinkedIn: linkedin.com/in/rand-oraij-49965b436

PROFESSIONAL SUMMARY

Full-Stack Developer (Web & Mobile) with hands-on experience building and shipping production applications with Flutter, React, and Node.js. Currently contributing to a live multi-app delivery platform at Casper AI and building bilingual (Arabic/English) web applications at Sityx. Experienced in clean architecture, state management (GetX, Riverpod), REST APIs, real-time features (WebSockets, Firebase), and SQL/NoSQL databases. Holds a Bachelor of Information Technology Engineering (Data Science) and is pursuing a Master's in Web Science and Artificial Intelligence. Open to remote, full-time, and contract roles.

SKILLS

Mobile: Flutter, Dart, GetX, Riverpod, Dio, Firebase (Push Notifications), Google Maps, Offline-First Architecture, React Native (basic)

Front-End: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Vue.js, Responsive Design, i18n / RTL

Back-End: Node.js, Express.js, Django, Flask, Python, REST APIs, WebSockets, Socket.io, JWT Authentication

Databases: SQL, MySQL, PostgreSQL, SQLite, MongoDB, Firebase, Sequelize

Programming Languages: Dart, JavaScript, TypeScript, Python, Java, C++, C#

Tools & DevOps: Git, GitHub, Docker, CI/CD, Stripe, Figma, Microsoft Office (Word, Excel, PowerPoint)

AI Tools: AI-Assisted Development, Claude, Google Gemini, GitHub Copilot, OpenAI API, HuggingFace, Prompt Engineering

Practices: Clean Architecture, Feature-First Architecture, State Management, SDLC, Agile Teamwork, Accessibility (WCAG)

WORK EXPERIENCE

Flutter Developer — Casper AI

Jul 2026 – Present

Remote | Part-time

- Build cross-platform Flutter applications for Casper AI's AI-powered products, implementing clean UI architecture and complex state management.
- Core contributor to Blink Delivery, a live delivery platform made up of three Flutter apps (customer, merchant/admin, and driver) serving real customers and orders.
- Integrate mobile apps with backend APIs and an AI layer that personalizes offers based on customer behavior.

Full-Stack Developer — Sityx

Dec 2025 – Present

As-Suwayda, Syria (Remote) | Part-time

- Build and maintain end-to-end web applications for Sityx, a cloud hosting and software development company, using React, Node.js, and Express.
- Developed the company's bilingual (Arabic/English) marketing website with full RTL support, interactive hosting-plan pricing, live domain search, and a lead-generation contact form.

Mobile Application Developer (Volunteer) — AI-Anqoud Multi-Service Platform

Aug 2025 – Dec 2025

As-Suwayda, Syria | Bread Distribution Mobile Solution

- Developed the Flutter app used by citizens and field agents to manage bread quotas and distribution tasks.
- Engineered a high-speed QR validation module with optimized camera handling for near-instant scan-to-verify by field agents.
- Implemented offline-first local caching with background synchronization for areas with limited or unstable connectivity.
- Set up CI/CD pipelines for automated builds and distribution, and built an accessible, WCAG-conscious UI suitable for elderly users.

Flutter Developer Trainee (Internship) — MadSolution Company

Jul 2024 – Aug 2024

Syria

- Developed cross-platform Flutter applications, integrated REST APIs, and managed application state for reliability.
- Worked across the full software development lifecycle (SDLC) in a team under tight deadlines; received a Certificate of Appreciation.

PROJECTS

Hebr — Private Tutoring Platform | React, Node.js, Flutter

- Built a live tutoring marketplace connecting students and parents in the UAE with vetted private tutors, with a React/Node.js web app and a companion Flutter mobile app.
- Implemented a package-based subscription system with tiered AED pricing, tutor vetting, and separate onboarding flows for tutors and referral agents.

debug_layout_hud — Open-Source Flutter Package | Flutter, Dart, pub.dev, MIT License

- Designed and published an open-source package on pub.dev: a debug-only floating HUD that shows live screen size, custom breakpoints, text scale, and text direction on-device.
- Implemented custom breakpoint resolution and MediaQuery-driven rebuilds that only trigger when the screen size changes, for minimal performance overhead.

Tala Net — ISP Customer Portal | React, Node.js, Express, PostgreSQL, Sequelize, Tailwind CSS

- Built a full-stack ISP dashboard where customers track data usage and request speed upgrades, with an admin panel for users, subscriptions, and bandwidth requests.
- Implemented HTTP-only session authentication with bcrypt hashing, rate limiting, role-based route protection, and bilingual (English/Arabic) RTL switching.

Velour Beauty — E-Commerce Platform | MongoDB, Express, React, Node.js, Stripe, JWT

- Developed a MERN e-commerce platform with product catalog, shopping cart, secure checkout, Stripe payments, and order tracking.
- Implemented JWT authentication with role-based access and a responsive admin panel for product and order management.

Sufra — Community Food Sharing Platform | React, Node.js, Express, MongoDB, Socket.io

- Built a food-donation platform connecting restaurants and donors with people in need, with real-time inventory tracking and location-based matching.
- Implemented role-based access (donors, recipients, admins) with JWT authentication.

Dream Weaver — AI Mobile Application | Flutter, Riverpod, Docker, NVIDIA CUDA, Vue.js, Node.js

- Built a Flutter app that turns text dream descriptions into AI-generated images using HuggingFace and OpenAI models, following Clean Architecture with Riverpod.
- Set up a GPU-accelerated backend with Docker and NVIDIA CUDA, JWT authentication, voice-to-text input, and a Vue.js/Node.js admin dashboard.

Institute Course Management App | Flutter, Dart

- Built a course management app for educational institutes with a protected administrative portal for managing courses, content, and student access, plus real-time course browsing for students.

EDUCATION

Master's in Web Science and Artificial Intelligence <i>Syrian Virtual University, Syria</i>	2026 – Present
Bachelor of Information Technology Engineering (ITE) — Major: Data Science <i>Syrian Virtual University, Syria</i>	2020 – 2026
Bachelor's Degree in Business Administration <i>University of the People, United States (Online)</i>	2020 – 2025
Diploma in Business Administration <i>University of the People, United States (Online)</i>	2025 – Present

ACTIVITIES

Participant — SVU Programming Contest	2024
• Competed in the Syrian Virtual University Programming Contest after an intensive bootcamp on data structures, algorithms, and problem solving, using C++ and Python.	

LANGUAGES

Arabic: Native | English: Intermediate (B2)
